

INDICATIONS FOR CREATININE CLERANCE

INSTRUCTIONS FOR THE COLLECTION OF SAMPLES

- Collect 24-hour urine, drinking plenty of fluids during collection.
- 24-hour urine collection: Before 7:00 am, urinate deeply to empty the bladder (this urine is discarded). From that moment collect all of all urinations, including the last at 7:00 the next day.

A large container or several small containers may be used. Label the containers with your full name.

- Attend to the Laboratory with 24-hour urine and fasted for blood collection from 7:30 to 11:00 from Monday to Friday.
